

16.02 DEFINITIONS. In the interpretation and enforcement of this chapter, the following definitions shall apply:

(1) ELECTRICAL SYSTEM. All wires, equipment or devices installed for the purpose of conducting or safeguarding electrical current at all voltages.

(2) ELECTRICAL WORK. Any act in connection with the installing, altering or maintaining of electrical systems, which act ordinarily requires the use of tools.

(3) WIRING. All conductors and all other devices incidental to the safe conduction of electrical current.
