

The on-line schools project was created as a comprehensive educational resource for those interested in pursuing higher education in the State of WI. This resource is a compilation of every college program offered online in Wisconsin that is offered full and part time. This list was submitted by Jennifer Lee.

This database will be updated yearly and will always remain free and open. Higher education for all students is a passion of Jennifer's, and passing knowledge to what types of programs exist out there in hopes that students will find a higher education program that excites them is her goal. Jennifer hopes that our schools, counselors, advisors, parents and students will find this resource useful.
