### **Puzzled by Plastics?**

Caps are not recyclable. Please remove them from the bottles and throw them in the garbage. All recyclable plastics should be thoroughly rinsed and cleaned.

### **If plastic bags are recyclable why doesn't the Village of Biron recycling program collect them?**

Plastic bags can get tangled up in the machinery used to separate recyclable material such as plastic/glass bottles and cans. Several area stores are drop off sites for plastic bags.

Recycling your electronics is important because they contain valuable materials that can be recycled and reused, including plastics, steel, glass and precious metals like gold and copper.

Many devices also contain dangerous materials such as lead, mercury, cadmium and chemical flame retardants. If disposed of improperly, these materials can leach into the environment where they may affect human and environmental health.

The best practice is to keep items from going to the landfill in the first place. If items are **clean and gently used** consider donating them to the following community resources. Not only are you helping the environment, but contributing clothing, furniture, and other household items to those in the community that have a need is a good thing.
